

Integration Partnerships with CodeCorrect

Synopsis:

- Automated workflow for providing medical necessity alerts
- Additional online editing such as CCI bundling, modifier usage, and more
- Online access to the coding content necessary to fix the problem raised by the coding alert

“CodeCorrect is so compelling because we can embed its vast amount of available intelligence into our work flow.”

Partner with a trusted leader...

Today’s healthcare reimbursement environment is dynamic - and to a large extent “code-based.” Intelligent charge capture, accurate medical necessity verification, denial prevention, chargemaster management and appropriate modifier usage are just a few of the specific areas where effective “coding tools” are critical. Revenue cycle management applications that validate coding optimally will achieve competitive differentiation.

CodeCorrect provides highly trusted web-based coding and compliance tools that can be integrated into your revenue cycle management software solution. Integration of CodeCorrect tools and information are a means for you to obtain a competitive advantage, incremental revenue and more satisfied clients.

Software vendors turn to CodeCorrect because:

- Their software solution needs to incorporate a coding tool set.
- Their software solution currently incorporates some form of coding tools, but they want a better, faster and more affordable means to gain results.

Hospitals and clinics experience reduced denials and enhanced compliance when their software vendor integrates with CodeCorrect because CodeCorrect facilitates:

- Automated workflow for providing medical necessity alerts
- Additional online editing such as CCI bundling, modifier usage, and more
- Comprehensive coding and compliance content updated as regulatory changes occur
- E-mail notification via CodeCorrect interactive Informants® which alert users of regulatory changes and prompts action*
- Application of national and local rules for both facility and professional environments

What We Offer:

Our services and the content behind them are updated on a consistent basis by our experienced team of coding and compliance professionals. The result is coding reimbursement intelligence that is comprehensive, affordable and easy to integrate.

PEER REVIEWED
by HFMA*

*HFMA staff and volunteers determined that this product has met specific criteria developed under the HFMA Peer Review Process. HFMA does not endorse or guarantee the use of this product.

- KnowledgeSource[®] is for those committed to revenue cycle optimization and revenue cycle integrity. The tool is comprised of numerous coding databases, coding crosswalks and regulatory information augmented by CodeCorrect's data analytics, coding and billing intelligence. Consistent updates, coupled with actionable e-mail notification of regulatory changes via Informants[®], to all stakeholders assures currency of information for all team members and departments.
- Integrated CodeCheck uses Web Services to enable integration of your healthcare information system with CodeCorrect's code validation engine. Codes (Part A or Part B) are edited by our Medical Necessity Checker for LMRP/LCD. Alerts can also be generated against a more extensive set of edits, such as CCI bundling rules and modifier usage. The result is that patient encounters with charges contrary to coverage rules are highlighted and can be addressed before they become denials or compliance issues.
- CodeCorrect Data Files are available for integration into your system for use in conjunction with or independent of Integrated CodeCheck – depending on your business needs. CodeCorrect provides downloadable data files for LMRP/LCD, ICD-9, Anesthesia code mapping, ASC and many others.
- ABN Manager[®] helps reduce Medicare denials and improve financial performance while providing a better way to manage staff productivity. ABN Manager informs providers and/or front office staff when Medicare patients may be responsible for certain services, and it facilitates the generation of CMS-compliant Advance Beneficiary Notice (ABN) forms for the patient's signature. RxCodeCheck validates codes, issues alerts and links to reference content to enable payers and providers to quickly check prescribed drugs against medical coverage policies and confirm if billable under Part B (through Medicare) or alternatively, determine if the drug is now payable by new Part D prescription drug plan (PDP) sponsors.
